

ENVIRONMENTAL POLICY

Our company occupies itself with precise processing of sheet metals, construction, assembly of components and painting. The most crucial criteria of our business activity are trust and satisfaction of our clients, local community, suppliers, workers and owners. Our goal is to provide the clients with products and services of the highest level and ensure taking good care of the environment.

Environmental policy exercised by our company is corresponding to the influence and scale of impact on environment. It constitutes the basis for appointing environmental tasks and goals.

To maintain and deepen the earned trust and satisfaction as well as to assure sustainable growth, our company adopts the following tasks:

- Delivering the goods and services friendly to the environment, of the quality fulfilling the needs of our present and future Clients, at optimum cost,
- Reducing harmful impact of our activity on the environment.

We fulfill our commitments by:

- meeting all the requirements of the adequate provisions of law,
- following the concern for environment in decisions involving offered products, introduced technological processes, services and business cooperation,
- perfecting the technological processes as well as modernization of devices and installations leading to improvement of quality and reduction of harmful impact on environment,
- rational utilization of utilities,
- analyzing the effects of potential pollution and preventing its occurrence (sewage, waste, emissions),
- employing the conditions of the General Requirements for the Environmental Protection for the Suppliers and Service Providers,
- raising environmental awareness among the employees, whose work impacts the environment,
- respect of ISO 14001 requirements and continuous improvement,
- following REACH and RoHS requirements, including our suppliers,
- employees environmental awareness.

The foundation for all our initiatives, rooting directly from and inextricably weaving into the development strategy, is care for the natural environment.

Węgrów, 28.01.2016

Marian Klimek

Managing Director
